

Enrolling in 2FA for Haiku, Canto, and Rover

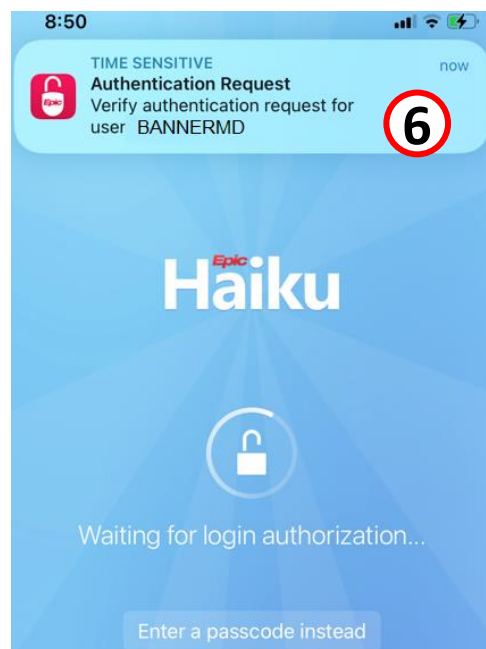

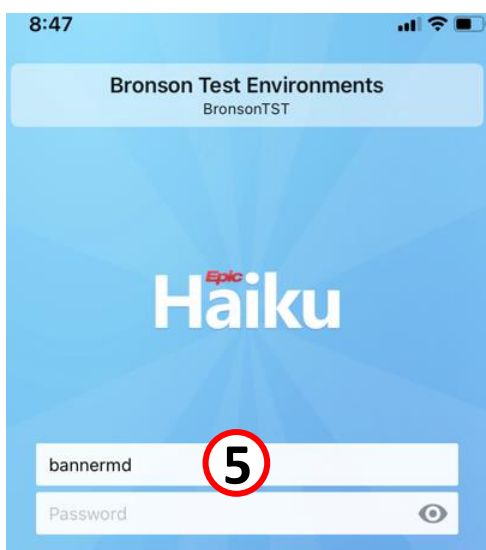

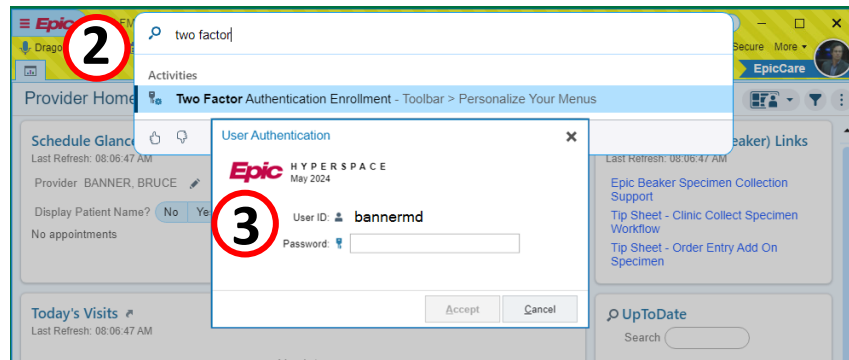

Two-factor authentication (2FA) improves the security of your account by using a secondary device to verify your identity when using Haiku, Canto, or Rover. This adds an extra layer of security to ensure that someone with only your password cannot access your account. This will require you to either enter a numeric passcode or to respond to a push notification that is delivered to your mobile device running the Epic Authenticator App. The app is available from your mobile device's App store. This does not replace using Imprivata for EPCS or for logging into other Bronson resources.

Here are the steps of the process:

- Download the Epic Authenticator app from your app store.
- In Epic, register your device by following the steps in Two Factor Authentication Enrollment activity.
- Login into Haiku/Canto/Rover
- Receive and accept a Verification Authentication Push notification on your phone.
- Continue using Haiku.

Try It Out: Enroll your device for 2FA

1. On your mobile device, install Epic Authenticator.
2. In the Epic Search Bar, enter Two Factor and click on the result.
3. Login using the same password you use to log into Epic.
4. Follow the prompts to enroll your device.
5. Login to Haiku/Canto/Rover
6. Tap the push notification.
7. Approve the login request.

Detailed Epic Enrollment Steps

Two-Factor Authentication - Enrollment

Welcome Configure Verify Finish

Welcome!

Two-factor authentication improves the security of your account by using a secondary device to verify your identity. This adds an extra layer of security to ensure that someone with only your password cannot access your account. This extra layer of security will require you to either enter a numeric passcode or to respond to a push notification that is delivered to your mobile device.

Click "Get Started" to configure your device.

If you have any questions contact the IT Helpdesk @ (269) 341-6330 or via email @ ithelpdesk@bronsonhg.org.

Welcome Configure Verify Finish

You are now protected by Epic Two-Factor Authentication!

When logging in or authenticating, various Epic applications may send a notification to your mobile device to verify your identity. Tap on the notification to continue.

If you don't receive a notification, you can also enter the numeric passcode displayed in the mobile app.
